Technical Skills

- Python, Django, React, Node.js, Express, PHP, Laravel, C#, .NET, SQL, API, Git, Agile
- HTML, Tailwind CSS, Jasmine, Supabase, MongoDB, MySQL, Figma, Server Hosting

Projects

Project Portal | *Full Stack, PHP, Laravel, React, Node.JS, API, CMS* ((•)) Live 🐱 Code
- Developed a comprehensive platform for my developed/developing projects featuring a Content Management System (CMS), individual apps and more.
- Implemented Restful APIs to manage dynamic data exchange between front-end and back-end for my projects.
- Guest credential for CMS Login access (guest@example.com/ guest).

Portfolio | *Python, Django, RESTful API, React, Canvas, SQL* ((•)) Live 🐱 Code
- Built a dynamic portfolio with React and Canvas, offering an interactive user experience.
- Created a robust Django-based CMS for the backend, enabling easy management and updates of portfolio content. ((•)) Live 🐱 Code
- Deployed the frontend and backend separately on online servers, ensuring seamless data synchronization through RESTful APIs.

Healthy Pantry | *React, Supabase, Tailwind CSS, Serverless* ((•)) Live 🐱 Code
- Developed an app with a React-based CMS for managing food and recipes data.
- Utilized React Router and React Query for efficient navigation and external API fetching.
- React Router for navigation and React Query for efficient external API data fetching.
- Setup Supabase for serverless data management, enabling efficient backend integration

Lucky Lottery Picker | *JavaScript, React, Tailwind CSS* ((•)) Live 🐱 Code
- Developed a Canada Lottery app using Tailwind CSS for mobile-optimized experience.
- Utilized Reducer and Context API for efficient state management, boosting performance.
- Created a feature to enable users to add lucky numbers and generate random picks.
